Phased Reopening Plan Town of Ulster Library

Updated July 2020

(adapted from a model provided by MidHudson Library System)

LEVEL A & B

Service Level A

Library Services Under Stay at Home Orders with 100% Workforce Reduction for Nonessential Businesses

Stay-at-home orders can mitigate the risk of spreading COVID-19 by limiting person-to-person contact through respiratory droplets, which is the main way the virus is spread [1]. Under stay-at-home orders the library building will be closed to library patrons with the library supporting the community primarily through services online, by phone, and any other way patrons can interact with staff and access library resources without meeting in-person or entering the library building. Traveling to the library to obtain materials is to check out materials would violate stay-at-home orders and pose a risk to staff and public health.

Service Level B:

Curbside Service

At this level of reopening **there is still a high risk of transmitting COVID-19** through person-to-person contact, but falling hospitalization and death rates related to COVID-19 and other regional precautions put in place indicate to state and local health officials that “more essential” retail business operations and professional services with lower risk of infection can begin to reopen with precautions in place to reduce person-to-person contact and transmission of the virus including curbside pickup. [9]

At this level of service, the library will **coordinate the services offered with neighboring libraries** to avoid creating a dangerous situation where too many people are drawn to the library. The library will offer services to all MHLs member library patrons as outlined in the [MHLs Free Direct Access Plan](#). Services offered will limit public and staff access to the building and interactions where possible. Some staff may be back in the building working while others may still be telecommuting to limit unnecessary staff exposure and observe restrictions still in place from state and local guidelines.

Transmission of COVID-19 to persons from surfaces contaminated with the virus has not been documented, and the most common vehicle for transmitting the disease is through person-to-person contact. [1] The World Health Organization [3] and the Northeast Document Conservation Center [4] report that COVID-19 may live on paper and cardboard for up to 24 hours and on plastic and other surfaces for up to 72 hours, and it may be possible for a person to get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes. Physical library materials will be handled and processed with these risks and timelines in mind. At this level of service, all staff that are capable and whose work can be completed from home will telecommute according to the library's telecommuting policy. The library will provide staff working at the library facility with necessary PPE.
